## Tooltip

For the Lecturer component on the client side, when you hover over the lid, it shows the user via a tooltip that it cannot be altered.

The screenshot shows a web interface for a Lecturer component. At the top, the ID 'G00338424' is displayed. Below it are navigation links: 'Home', 'Lecturers', and 'Students'. The form contains the following fields:

- LID: L001
- Name: Alice O'Connor
- Tax Band: B1
- Salary Scale: 3

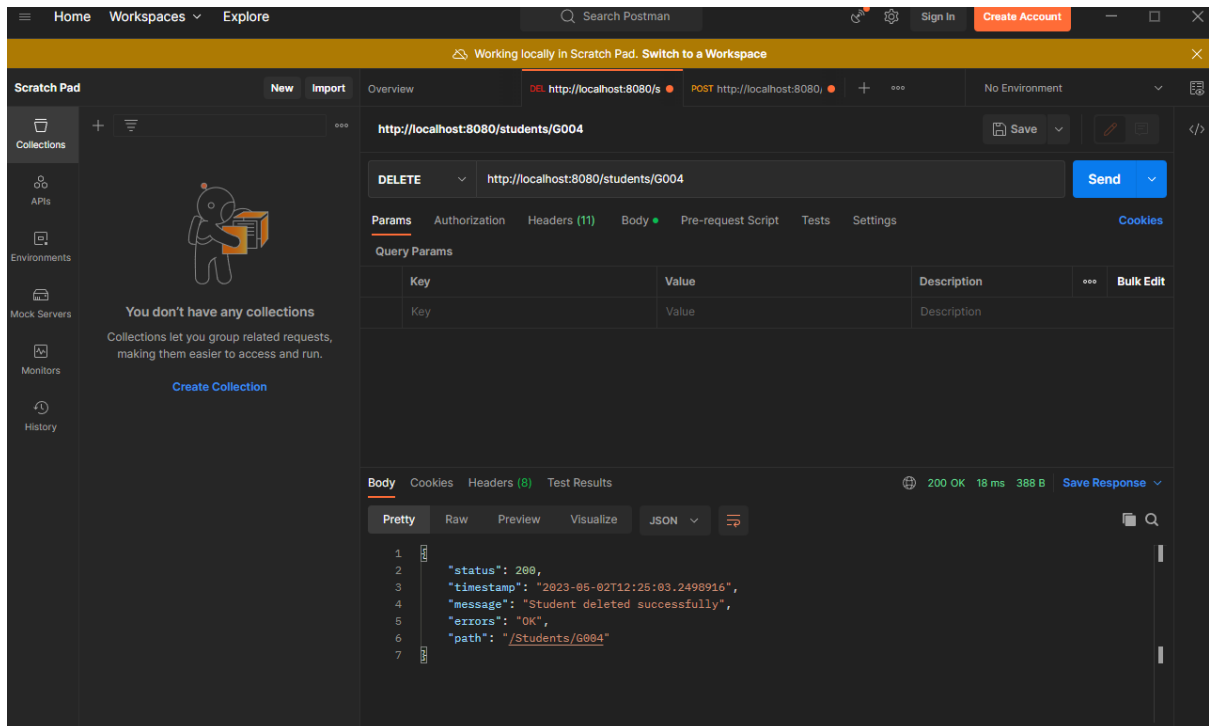

A tooltip message 'LID Cannot Be Altered!' is displayed over the LID field. An 'Update' button is located at the bottom of the form.

## Delete Student

When a student is deleted in the client they are automatically removed

SID	NAME	ACTION	SID	NAME	ACTION
G001	Tom Higgins	Delete	G001	Tom Higgins	Delete
G002	Mary Murphy	Delete	G002	Mary Murphy	Delete
G003	Alan Fitzgibbon	Delete	G003	Alan Fitzgibbon	Delete
G004	Bart O'Malley	Delete	G004	Bart O'Malley	Delete
G005	Alice Browne	Delete			

But if you delete a student from the server side and then try from the client it will cast the following error

When we then go to delete G004 we get

**G00338424**

[Home](#)  
[Lecturers](#)  
[Students](#)

**Error**

Student not found
